Dear Mr. Tarr,

I ask you to not approve any efforts to rush through approval of the Atlantic Coast Pipeline until relevant agencies including the DEQ have had time to adequately study and evaluate all the dangers the pipeline poses to the health, safety, water supply, and jobs of people living in the pathway of the project.

Given all the risks nearby residents are being asked to take, the burden of proof should be on proponents of the ACP. The state government has a role in making sure that public health and safety concerns are thoroughly addressed before anything is approved. Thank you.
